

Earth's Organs are showing signs of failure and the prognosis could not be more serious

The organs of the Earth are showing signs of failure, and there is no transplant, no planetary dialysis machine, no intergalactic surgical wizardry that can fix them. Ecosystems and biodiversity are as important to human society as a heart, liver, kidneys and lungs are to you.

Yet it's us that's causing this worldwide biological systems collapse, despite the fact that our own lives - our food, jobs, homes, governance, security and everything else - quite literally depend on their health.

- Hannah Hamilton, "Ireland's Biodiversity needs intensive care"

CREATION SPIRITUALITY RETREAT

"DYING TO LIVE"

"The Universe as a whole, in all its manifold relationships, shows forth the inexhaustible riches of God."

- Laudato Si 86

This time of retreat is an invitation to experience our profound kinship with the whole community of life as the catalyst for transformative ACTION.

- ❖ What kind of world are we envisaging?
- ❖ What conversion do we need?
- ❖ What thresholds do we need to cross?
- ❖ How can we become agents of Active hope in our world today?

"With an understanding of our profound kinship with all life, we can establish the basis for a flourishing earth community."

- Thomas Berry

The atmosphere of the retreat will be reflective offering time and space to face up to the catastrophic state of the environment, and to make choices for life, for hope and for active engagement.

"We can't know how things will unfold. What we can do is make a choice about what we'd like to have happen, and then put ourselves fully behind that possibility. An inspiring wave of change is spreading through our world."

- Joanna Macy & Chris Johnstone
